

Kylie Cuadra & Prince Macalino

Full-Stack Developers — Java · AI · Cloud · Enterprise Systems

christkylie.cuadra@gmail.com · macalinoprinceallyson@gmail.com

SUMMARY

Bracket Systems is a two-person full-stack development team, freelancing since 2019, building web platforms, applied-AI tools, and enterprise systems for businesses and institutions. Combined experience spans Java/Spring Boot backend development, computer vision and OCR pipelines, cloud architecture, and PHP/MySQL business systems built for real institutional clients.

TECHNICAL SKILLS

- Backend & Cloud: Java, Spring Boot, Oracle & MS SQL, Azure, RESTful APIs
- Applied AI: Python, YOLO object detection, OCR pipelines, computer vision
- Web & Systems: PHP, MySQL, React, JavaScript, Bootstrap, jQuery
- Practices: full-stack delivery, systems architecture, institutional & enterprise platforms

SELECTED PROJECTS

[CV] Real-Time PPE Scanner & Compliance System

Custom-trained detection model monitoring industrial video feeds in real time to recognize safety compliance gear and automate occupational safety monitoring.

Python · YOLO · OpenCV · Object Detection

[AI] Intelligent Document Flow & Extraction Engine

Automates scanning, categorizing, and routing of institutional files, extracting metadata via OCR and image processing across multi-tiered workflows.

PHP · OCR Engines · Image Processing · MySQL

[ENT] Accreditation Document Management System

Built for Cavite State University: a centralized, audited document vault with version-locking, granular security policies, and continuous compliance verification.

PHP · MySQL · jQuery · Bootstrap

[OPS] NXS Commercial Spa Operations Suite

Full-lifecycle operations platform handling loyalty tracking, staff shift utilization, secure checkout, and multi-tier revenue reporting.

PHP · MySQL · Transaction Analytics

[SHOP] CavShop

Lightweight e-commerce system for small retail workflows with storefront, cart/checkout, and role-based admin and cashier dashboards.

PHP · MySQL · Frontend UI

INDIVIDUAL BACKGROUND

Kylie Cuadra

Full-Stack Developer — Java · AI · Cloud

Current role: Java Developer, Pioneer Insurance & Surety Corp.

Freelance: Full-stack web development since 2019

Certifications: Sapiens API Composition Engine; IDITSuite Development Program; Advanced MS SQL T-SQL; IBM AI Fundamentals (2025)

Recognition: Employee of the Year, 2025

Prince Macalino

Full-Stack Developer — Java · AI · Cloud

Freelance: Full-stack web development since 2019

Education: BS in Information Technology, Cavite State University

Certifications: AWS Certified Cloud Practitioner
